

# **Markdown note-taking app**

Guideline for user

Team : Dy Daly & Van Sotheany

How to use our application correct and professionally?

1. Successfully run our program
2. Write your note inside the text box and use a markdown syntax .

Markdown	HTML	Rendered Output
# Heading level 1	<h1>Heading level 1</h1>	Heading level 1
## Heading level 2	<h2>Heading level 2</h2>	Heading level 2
### Heading level 3	<h3>Heading level 3</h3>	Heading level 3
#### Heading level 4	<h4>Heading level 4</h4>	Heading level 4
##### Heading level 5	<h5>Heading level 5</h5>	Heading level 5
##### Heading level 6	<h6>Heading level 6</h6>	Heading level 6

Markdown	HTML	Rendered Output
Heading level 1 =====	<h1>Heading level 1</h1>	Heading level 1
Heading level 2 -----	<h2>Heading level 2</h2>	Heading level 2

Markdown	HTML	Rendered Output
This text is ***really important***.	This text is <em> <strong>really important</strong> </em>.	This text is <i><b>really important.</b></i>
This text is ___really important___.	This text is <em> <strong>really important</strong> </em>.	This text is <i><b>really important.</b></i>
This text is __*really important*__.	This text is <em> <strong>really important</strong> </em>.	This text is <i><b>really important.</b></i>
This text is **_really important_**.	This text is <em> <strong>really important</strong> </em>.	This text is <i><b>really important.</b></i>
This is really***very***important text.	This is really<em> <strong>very</strong> </em>important text.	This is really <b>very</b> important text.

3. You can preview the note on the right side.
4. After you finish, there are two buttons that allow you to export it to .txt or .pdf
